

PROFILE

Computer Science Engineering undergraduate with hands-on experience in Python, Flask, HTML, CSS, JavaScript, and MySQL. Experienced in developing web applications, database-driven systems, CRUD operations, database connectivity, data validation, debugging, and testing. Strong interest in web development and application development with good problem-solving, analytical thinking, teamwork, communication, and ability to learn new technologies.

PROJECTS

- Student Management System – Python, Flask, MySQL** 2024
Developed a web application for managing student records efficiently. Implemented database connectivity, SQL queries, CRUD operations, data validation, error handling, and responsive user interfaces. Worked on application testing, debugging, and troubleshooting.
- Department No-Due Clearance System – Python, Flask, MySQL** 2025
Developed a role-based web application to automate the no-due verification process for the Computer Science and Engineering Department. Implemented authentication, database integration, CRUD operations, data validation, attendance management, eligibility verification, debugging, and certificate generation.
- Spam Email Detection System – Python, Flask, Machine Learning, NLP** 2026
Developed a Python-based web application to classify emails as spam or legitimate. Implemented backend application logic, data processing, validation, testing, and debugging. Designed the application using logical components to provide a functional web-based solution.
- IoT-Enabled Intelligent Vehicular Emission Monitoring and Automated Alert System using Cloud Analytics – ESP32, Sensors, GPS, ThingSpeak, Python** 2026
Developed an IoT-based monitoring application using ESP32, sensors, and GPS to collect real-time vehicular emission data. Integrated ThingSpeak for cloud-based monitoring and implemented automated alerts for abnormal emission levels. Worked on data processing, system integration, debugging, and testing.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C, JavaScript
- Web Technologies:** HTML, CSS, JavaScript, Flask, React.js, REST APIs
- Backend Development:** Flask, REST APIs, Application Development, CRUD Operations
- Database:** MySQL, SQL, Database Connectivity, CRUD Operations, Data Validation
- Software Development:** Problem Solving, Debugging, Testing, Error Handling, SDLC
- Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
- Development Tools:** VS Code, Eclipse, Git, GitHub
- Soft Skills:** Analytical Thinking, Logical Reasoning, Problem Solving, Team Collaboration, Communication, Adaptability, Quick Learning

EDUCATION

Alva's Institute of Engineering and Technology, Mangalore (VTU)	2023–Present
BE (Computer Science and Engineering)	CGPA: 8.6/10
PUC / 12 th – PoornaPrajna Pre-University College, Udupi, (KSEAB)	2021-2023
SSLC / 10 th – G M Vidyaniketan Public School, Brahmavar, (CBSE)	Percentage: 84%
	2020-2021

CERTIFICATIONS

- Infosys Springboard – Data Structures and Algorithms using Java
- Infosys Springboard – Database Management System
- Coursera – Software Engineering and Agile Software Development

ACHIEVEMENTS

- Won Third Place in Web Wizards, a Website Building Competition (2024)
- Participated in AARAMBH 2025 – National Level Ideathon, NITK (2025)
- Participated in BuildWithAI Innovation Hackathon – International Level Hackathon, Presidency University, Bengaluru (2026)
